

Reading a Degree Progress Report

Associate of Arts Degree in General Studies

Learning how to read your DPR
will keep you in the driver's seat
of your degree program.

DPR

(Degree Progress Report)

- It is very important that as a student in General Studies you know how to read the degree progress report (DPR) which you can access via OneStart.

DPR

What you can avoid

- Knowing how to read a DPR will keep you from making costly mistakes such as:
 - Taking duplicate courses
 - Taking classes that don't fit the area in which you need hours
 - Taking cross-listed classes (basically the same or similar course, but a different course number, resulting in only one counting toward your degree)
 - Exceeding the 15 credit hour rule (excess hours in a department or professional school)

DPR

What it can help you do

- You can keep an accurate count of the hours you need to complete your degree
- You can plan your semesters in advance
- You can see where you need hours and/or competencies
- You can avoid spending time and money on classes you do not need

Starting the report

- Before beginning this PowerPoint you should print a copy of your DPR or have your DPR displayed on your computer in another open window.
- The PowerPoint will start with the top of the DPR

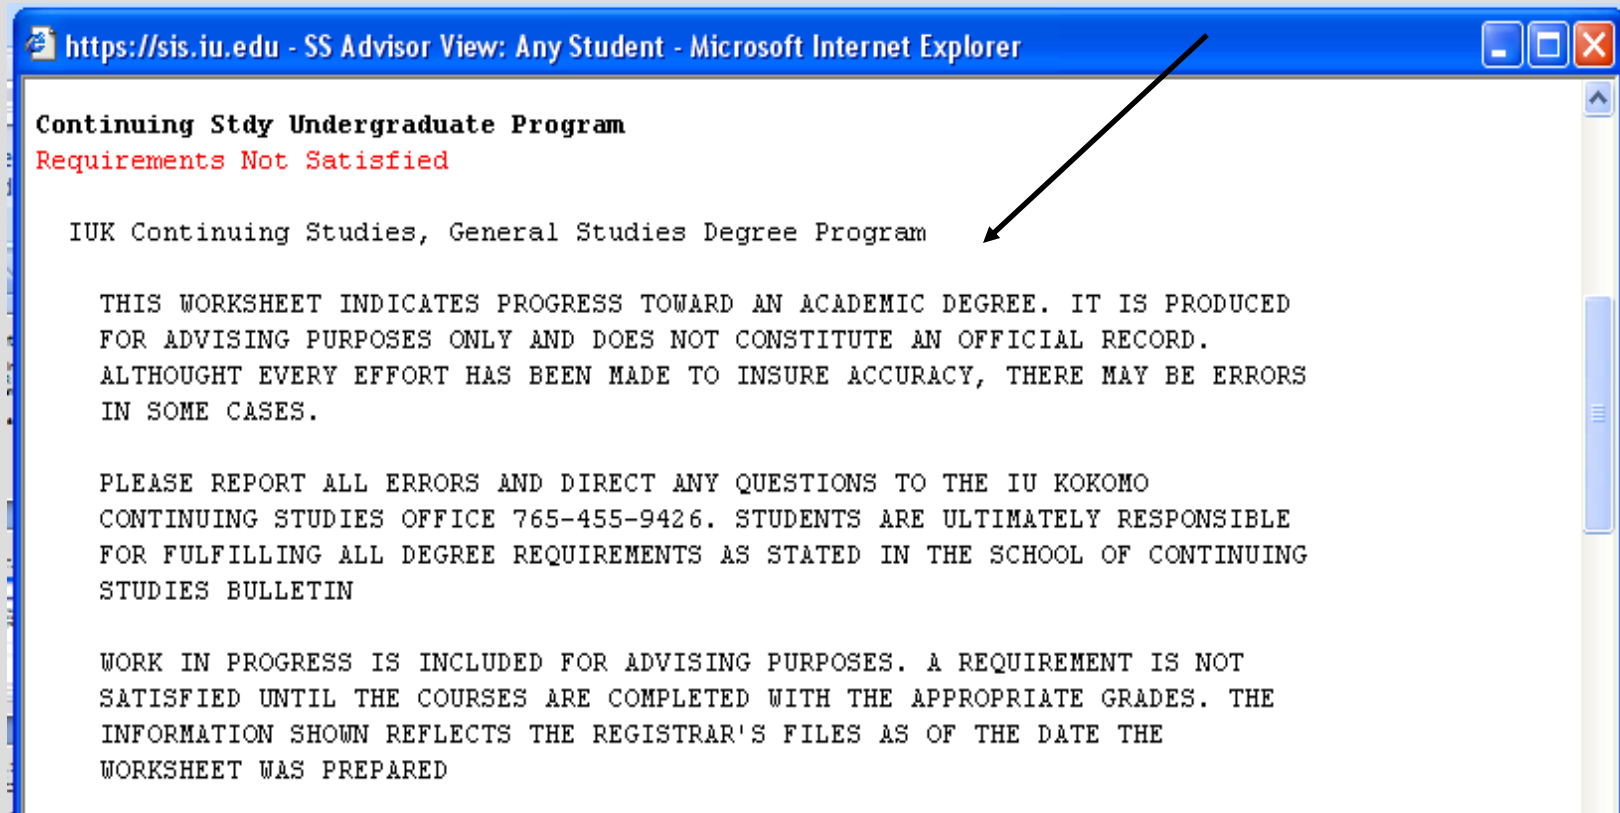

DPR display

When you open up your DPR this is the first area you will see. In this area you will see your name, student identification number and the schools at IU you have attended

If you have not completed the degree, you should see this red lettering.

It should list General Studies under Kokomo program

In the next section you will see “housekeeping information”. The main thing that is important here relates to the fact that this is not an official document; it is for advising only. If you feel that there is something in error on the report, you need to call the listed number. In this report, the DPR includes the courses in which you are currently enrolled, but until the class is finished the graded requirements are not complete.
